

40LC-1004

LDPE Protective Film

Product Description

40LC-1004 is a medium tack protective film consisting of a self-wound low density polyethylene carrier. It is made with a water based acrylic adhesive. The protective film provides abrasion, tear and puncture resistance and is suitable for interior applications.

Available in clear.

Main Applications

- Masking and protection of stainless steel
- Painted metals with low gloss or matte finish
- Matte or satin finished anodized aluminum

Product Information

Backing	Thickness (mil)	Adhesion to steel (oz/in)
LDPE Film	4	1 - 4
Adhesive Type	Elongation at Break (%)	Tensile Strength (PSI)
Acrylic	500-825	2400-2900

Application and Storage

Note: The physical and performance characteristics shown are averages obtained from tests performed according to ASTM and PSTC test methods. Matco can make no warranty of any kind as to the results of the adhesive product use. The information published here is representative of laboratory research on these products and is believed to be reliable. Values should not be used for specification purposes. Each user should make their own test to determine the products suitability for their own intended use and shall assume all risks and liabilities in connection therewith. Materials should be stored at 70°F (21°C) with 50% relative humidity.
